

CANADIAN BOARD OF EXAMINERS FOR PROFESSIONAL SURVEYORS

C2 – LEAST SQUARES ESTIMATION & DATA ANALYSIS

March 2018

Although programmable calculators may be used, candidates must show all formulae used, the substitution of values into them, and any intermediate values to 2 more significant figures than warranted for the answer. Otherwise, full marks may not be awarded even though the answer is numerically correct.

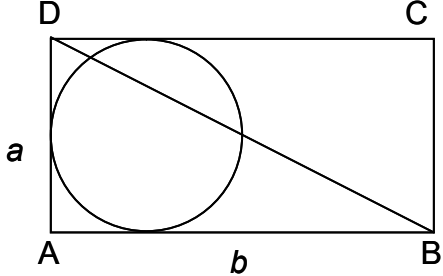

Note: This examination consists of 9 questions on 3 pages.
